SUMMARY

Full-stack developer (MERN · Next.js · TypeScript) shipping production software end-to-end — a live booking SaaS plus three AI products, including a HackBaroda 2026 finalist. Skilled in React, Node/NestJS, PostgreSQL, REST APIs, and LLM integration (Groq, Claude).

EDUCATION

Gandhinagar University

B.Tech. in Computer Engineering (Pursuing)

Expected 2028

Gandhinagar, Gujarat

EXPERIENCE

Full Stack Developer — FirstBookIt / SportsWalla

May 2026 – Present

Own end-to-end features on a live, multi-role sports-booking SaaS (scheduling, pricing, payments, dashboards) Ahmedabad, India

- Streamlined venue scheduling into a single interface by building a real-time slot-management calendar (weekly and monthly) with drag-to-block scheduling, manual booking, and peak/base price color-coding across 7-day grids
- Eliminated pricing miscalculations on midnight bookings by engineering a dynamic peak-pricing engine with client-side rule matching and server-side reconciliation, fixing a timezone bug that had broken every price comparison
- Eliminated cross-user data contamination on shared devices by designing multi-role JWT authentication across 5 roles with route guards and per-tab session isolation
- Cut redundant queries by consolidating dashboard data into a single aggregation endpoint with null-courtId rule inheritance, plus an automated slot-generation engine that creates CourtSlot records from turf hours on approval
- Streamlined releases by setting up a CI/CD workflow — branch strategy (main → staging → feature), lint-staged with Prettier pre-commit hooks, and automated Vercel preview deployments on every PR — while tuning the React Query cache for cross-user eviction

Stack: Next.js 14 · React · TypeScript · TailwindCSS · React Query · NestJS · Prisma ORM · PostgreSQL · JWT · Vercel

Hackathon Participant

2024 – Present

- Finalist at HackBaroda 2026 with CiteMind, an AI citation-memory agent; also competed in NASA Space Apps Challenge 2025 (Galactic Problem Solver), National Road Safety Hackathon (IIT Madras), Adobe India Hackathon, and Techstars Startup Weekend Gandhinagar (PDEU IIC)
- Built full-stack MVPs in 24–48 hours, leading frontend and backend integration with the MERN stack and pitching working products to judges with live demos

PROJECTS

HireLoop — AI Mock Interview Platform

hireloop-tau.vercel.app

Next.js · TypeScript · Groq (Llama 3.3 70B) · Web Speech API

- Built an AI interviewer spanning 21 tech roles with adaptive, real-time questioning in voice or text mode; each ~30-minute session ends with per-question scored feedback and a personalized improvement plan
- Open source (MIT), featuring a terminal-style UI and token-streamed responses

CiteMind — AI Citation Memory Agent

HackBaroda 2026 — Finalist

Next.js · Node.js/Express · MongoDB · Groq · Hindsight

- Built a full-stack AI agent that monitors brand citations across AI search engines (ChatGPT, Perplexity, Claude) and diagnoses citation decay in real time
- Integrated Hindsight persistent memory so the agent learns which fixes recover citations for a given site, turning past experiments into evidence-backed recommendations that improve over time

GitStory — AI GitHub Storyteller

git-story-gold.vercel.app

Next.js 15 · MongoDB · Anthropic API

- Transforms any GitHub user's commits, repositories, and languages into an AI-generated, magazine-style developer narrative in seconds, with shareable editorial output

FindUrTrip — Travel Platform

findurtrip.org

Next.js · React · Node.js · Tailwind CSS

- Travel platform with curated destination guides, trip planning, and a responsive UI; optimized and deployed to production

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, HTML, CSS

Frameworks & Libraries: React.js, Next.js, Node.js, NestJS, Express.js, Tailwind CSS, React Query (TanStack), Nodemailer

Databases: MongoDB, PostgreSQL, Prisma ORM, MongoDB Atlas

AI & Integrations: Groq, Anthropic (Claude) API, REST APIs, JWT Auth, Razorpay, Web Scraping

Developer Tools: Git, GitHub, VS Code, Postman, Hoppscotch, MongoDB Compass, Vercel, Render

Other: Multi-Tenant SaaS, CI/CD, Production Deployment
