

AGENTIC PHARMA INSIGHTS

Problem: Portfolio teams waste days stitching market, EXIM, patent/FTO, trials, internal PDFs, and web intel into one answer.

Outcome: A Master Agent orchestrates domain Worker Agents to deliver citation-first, decision-ready briefs in minutes.

What's in MVP: Chat interface, 3 data workers + Report Generator; one real API pipeline, and exportable PDF

Who uses it and why ?

Users

Portfolio strategy,
BD, medical affairs
and competitive
intelligence teams

Core tasks

Market sizing/growth,
trade flows, trials
by indication/MoA,
quick patent/expiration flags
internal PDF takeaways,
web intel

Guardrails

Source citations,
schema-validated
tables, deterministic
prompts, and
human-in-the-loop edits

Master + Worker Agents

Master Agent

Interprets query,
decomposes tasks,
routes to workers,
validates responses,
compiles final brief

Workers(MVP)

EXIM Trade,
Clinical Trials,
Web/Internal Insights;
Report Generator for
PDF with links

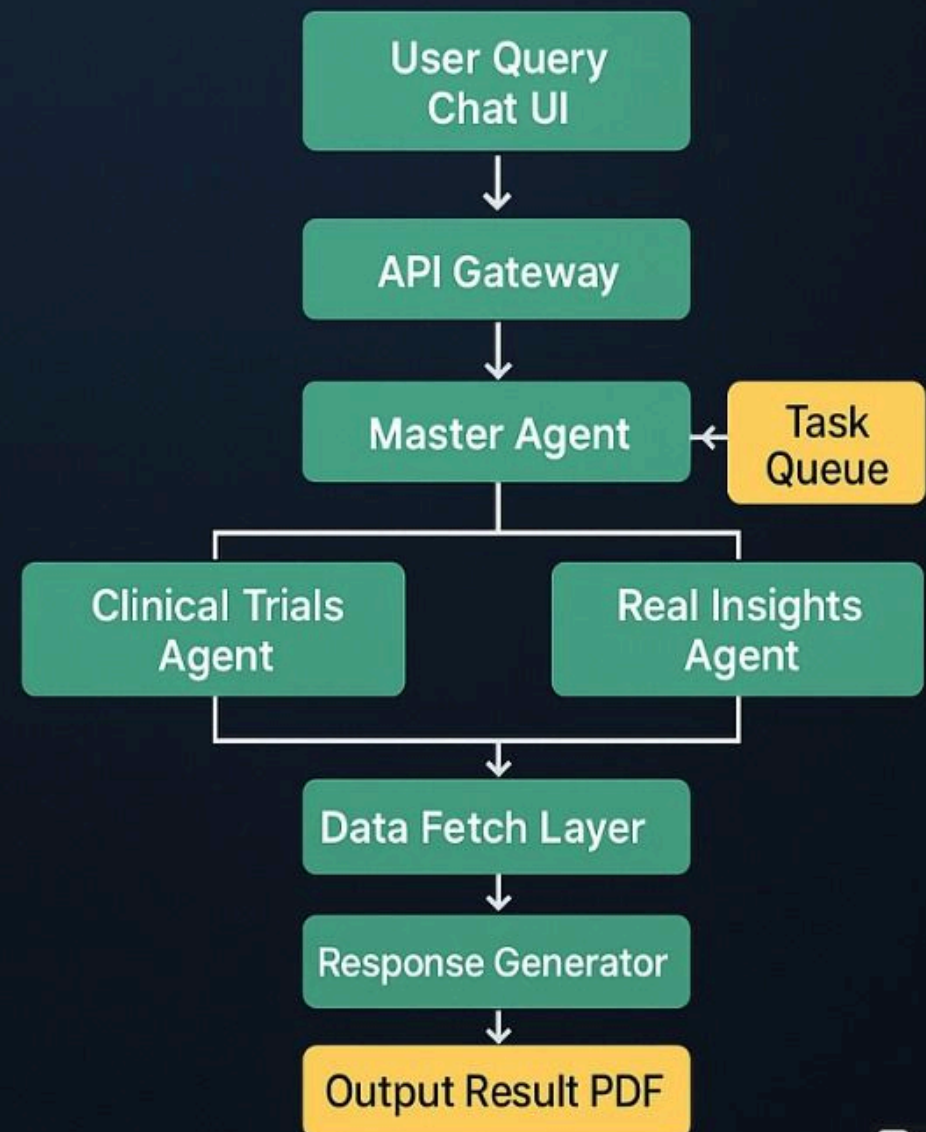

Pipes

API connectors +
RAG over uploaded
PDFs, Redis
cache, Postgres
metadata, observa-
bility for runs
